

## Dr. Moshos Heads Civic Leaders for Red Cross

Dr. Don C. Moshos was re-elected chairman of the Torrance branch of the American Red Cross at the annual meeting of the board of directors last week.

A dinner and full program, followed by the election of officers and members of the board of directors, marked the 1956 annual gathering of local Red Cross officials.

Dr. Moshos, who stepped into the top post last January will be assisted by the following officers elected for the 1956-57 fiscal year: Dr. W. H. Low, Stanley Remelmeyer, and John Kesson, vice-chairmen; Mrs. William H. Cochran, secretary;

and Mrs. Gordon S. Jones, treasurer.

Elected to the board of directors were: David L. Birdsong, Roy W. Boltz, Fred Boren, John A. Beasley, Sgt. D. C. Cook, William Cowan, and Mrs. C. Earl Conner.

The other directors elected were: Frank Dominguez, Jack N. Dabbs, Mrs. Winona Ellis, W. A. Felker, Mott Farrell, Dr. Paul J. Gethner, Al Greenberg, Henry Halverson, Albert Isen, Swayne Johnson, W. E. Kalbfleisch, John Kesson, Dr. Warren H. Low, P. H. Lisman, and John Melville.

The answers to everyday insurance problems!  
By LES KING

QUESTION: I know the Fire Insurance on my home automatically covers my garage up to 10% of the total amount of insurance but I recently converted part of the garage to a small apartment which I rent out. Does the 10% insurance still apply?

ANSWER: No, the conversion to an apartment and occupancy by people other than your own household force you to insure the building separately.

**USE OLD TEETH FOR NEW PLATES**

Question—  
"I have worn dentures for years. Because of gum shrinkage they don't fit any more. I like the way the teeth look; so can they be used in a new plate?" . . . asks Mrs. J. K. of Torrance

Answer—  
Yes, the old teeth from your denture can be used in a new plate and can be used in such a way as to save you one-half the cost of a new plate.

The technique is this: A brand new impression is taken of the mouth and the old teeth are cut off the old plate and re-set exactly as they were onto the new plate. This works out wonderfully well where a new bite is not required. Completely brand new plastic is used throughout and the finished product is a brand new denture except for the fact that the teeth from the former plate are used.
